

Burlington Aerial Lift Training

Burlington Aerial Lift Training - An aerial work platform is a mechanical access platform. This machine provides access to otherwise inaccessible areas for people or equipment. Also called an aerial device or elevating work platform, the device is usually utilized to access high areas. Construction and maintenance workers usually have to make use of aerial work platforms on the job. Firefighters use them for emergency access.

The aerial work platform is meant to temporary use, providing access to high places. They are intended to be operated by one individual, with the capability of lifting weights of not more than one ton. Various kinds have load limits that are higher. There are various kinds of aerial work platforms; like for example, there is a "scissor lift" and a "cherry picker".

Some aerial work platforms come equipped with electrical outlets or compressed air connectors for power tools. For specialist jobs, like lifting frames for window glass, an aerial work platform could come with special tools.

Individuals who would like to operate an aerial lift machine should go through training. Typically, the members of a Health & Safety Committee and their representatives are responsible for the inspection of every machine and work places and are likewise required to go through training. Individuals training would become familiar with aerial lifting device operation. They will likewise know the rules which apply to the safe operation of these machinery. Rules differ from province to province, and in worksites that are federally regulated.

Anyone who is needed to be lifted by or work near an aerial lifting device must be informed about possible hazards. In a general safety session, an Aerial Lift Training Video could be shown to educate all of the staff who are lifted by them or work near them.

Aerial Lift Training Program includes modules focused on the following: Aerial Lift Devices and Operating Controls; Hazard Identification; Pre Operational Checks for Aerial Lift Devices; and Platform Positioning & Park Positioning. The particular program is intended to train workers on the safe operation of self-propelled, elevated work platforms and self-propelled, boom supported, elevated work platforms. Workers who complete the program will be given a certificate, signed by an individual qualified to verify the successful completion of a hands-on practical exam.
