Burlington Aerial Lift Train the Trainer

Burlington Aerial Lift Train the Trainer - The train the trainer program for aerial lifts helps to teach the trainers how to safely train prospective operators in an industrial situation. Trainers would be given in-depth instruction about the workings of aerial lift machinery. The program is provided on an open enrollment basis and delivered at select training sites. Before the certification, trainers are evaluated and graded based on their demonstrated skills and knowledge.

The Aerial Lifts Train the Trainer Certification Program focuses on practical learning and as the best training provider within the business, we offer top notch hands-on training. We provide lots of opportunities to practice the techniques and concepts that are taught inside the classroom. Together with hands-on experience, trainers develop general knowledge of equipment theory and instructional methods, field and classroom communication skills, and ability to efficiently train and evaluate operators. Trainers will gain an understanding about what traits make a successful trainer.

The Aerial Lifts Train the Trainer Program likewise teaches the right techniques necessary in order to express the correct information inside the classroom and field setting. There are three aspects of machine operation which the trainer must learn how to convey to operators: what to carry out; how to do it; and why it should be done.

The program offers detailed, up-to-date reference material to help trainers convey the subject matter to equipment operators. Instruction manuals contain detailed information about all aspects of industrial mobile machine operator training. Included in the package are training aids which provide a visual reference to enhance the learning experience. The equipment-specific training products include important materials for both the trainer and the operator: videos/DVD's, overhead transparencies, safety message posters, equipment models; digital training aids and stability pyramid.
