Burlington Order Picker License

Burlington Order Picker License - Order preparation operation or also called order picking as it is more commonly known is a method utilized in warehouse operations and consists of personnel known as order pickers. The order picker's task is to take and collect articles in certain quantities so as to accomplish the customer's orders prior to shipment. Order picking is a basic warehousing process. The effectiveness in which this particular job is accomplished can be directly connected to a supply chain's productivity. Hence, order picking is one of the most controlled logistic processes. Order picking falls in the category of the warehouse management system.

There are several particular types of order picking. The main kinds include: wave picking method, pick to box method, picker to part method or piece picking, zone picking method and sorting systems method.

The pick to box method comprises the order picker filling the box with the stuff from her or his station. The box then moves to other picking locations until the client order is done. In this process, there is no movement of the order picker employees. In the wave picking method, the order pickers move all-around to be able to collect the necessary items for some orders. The picker to part method or piece picking is similar where the order pickers or picker move to gather the stuff required but for one order only.

In the sorting systems method, there is no movement of the order picking employees. Instead, the things are delivered to her or him via an automated system like automatic storage or a conveyor system. In the zone picking method, every order picker is assigned to one particular area. They are responsible for only realizing order picking within this specific zone.
