JLG Telehandler

JLG Telehandler Training Burlington - In the late 1960's John L. Grove, with his wife Cora set out on a cross country voyage in their RV. Newly retired, after spending several years working with his brother to manufacture their crane company into an industry leader, John had no idea that momentous trip would permit JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision material handling technologies was the end result of a road trip.

During their trip, John reacquainted himself with previous business connections along the way. In combination with these conversations and a significant event; two workers had been tragically electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John discovered an infinite marketplace for a product that could quickly and securely lift individuals in the air to accomplish upkeep and other building functions.

After their return from holiday, John set up a joint venture with two of his friends and bought a metal fabrication business in McConnellsburg, Pennsylvania. Starting with a small crew of twenty employees, they fashioned and sold their first JLG aerial work platform in 1970. The company incorporates some of the simple design elements of that original lift into existing versions.

JLG lift trucks have come a ways since Mr. John L. Grove came back to town from his cross-country road trip and since the first aerial work platform debuted on the market. Nowadays, the business proudly continues to expand itself into a range of marketplaces globally and develops new products to make certain customers are capable of being more efficient and perform in the workplace within a safer environment.
